SUMMARY

Rails Engineer with 8+ years of experience building and improving SaaS platforms and CRM's. Focused on system reliability, data integrity, and maintainability in applications serving large user bases. Known for improving production stability, reducing operational overhead, and helping teams ship with confidence through better structure, testing, and observability.

TECHNICAL SKILLS

Languages & Frameworks: Ruby on Rails, React, TypeScript, REST APIs, RSpec

Cloud & Infrastructure: AWS (EC2, RDS, S3, VPS), Docker, Linux

Databases: PostgreSQL, MySQL

CI/CD & DevOps: GitHub Actions, GitLab CI/CD, Bitbucket Pipelines

Observability & Monitoring: AppSignal, Sentry, New Relic, Honeybadger

Practices & Architecture: Agile (Kanban/Scrum), SOLID, TDD, RESTful API Design

Certifications: AWS SAA-C03 + GitHub Actions GH-200, Coding Dojo Software Development Bootcamp

PROFESSIONAL EXPERIENCE

Software Engineer at Teaching Strategies

2020 – 2025

- Led an integration audit and refactor, identifying data inconsistencies and reducing unnecessary API usage, improving data integrity and lowering operational costs
- Refactored core areas of the Rails codebase serving 1M+ users, improving system reliability, expanding test coverage, and reducing production defects in a high-traffic production environment
- Managed AWS infrastructure, improving deployment efficiency and overall system reliability
- Owned CI/CD, managing release validation and rollback strategies to ensure safe, reliable deployments in production
- Implemented monitoring and error tracking, improving observability and reducing time to diagnose and resolve production issues
- Conducted code reviews and mentored engineers, helping raise code quality and promote consistent engineering practices across the team
- Experienced building end-to-end features across backend systems and supporting frontend workflows
- Applied accessibility (WCAG/ARIA) and FERPA data protection standards across application design, ensuring compliance and improving usability for diverse users

Software Engineer at ReadyRosie

2017 – 2020

- Developed and maintained a Rails application, improving system stability and reducing production downtime through targeted fixes and performance improvements
- Partnered with Product and stakeholders to scope and deliver features, improving workflow efficiency and supporting key product initiatives
- Introduced service abstractions to improve performance, data processing reliability, and system maintainability
- Collaborated with cross-functional teams to define requirements and prioritize work, delivering features that improved usability and reduced friction in key user workflows

Earlier Career:

Real Estate Operations & Property Management (Entrepreneurial Experience)

- Operated and scaled residential and commercial rental businesses, managing listings, leasing workflows, pricing decisions, and ongoing property operations
- Built and refined operational systems for lead management, customer communication, and workflow standardization, improving efficiency and consistency

Technical Sales, Product Enablement & Business Development (Immersion Corporation, NASDAQ: IMMR)

- Led technical sales and product enablement at an early-stage technology company, partnering with engineering and product teams to translate customer needs into solutions
- Delivered technical demonstrations, integrations, and workshops, driving adoption across enterprise and international markets
