Experienced professional with a background spanning business ownership, software engineering, technology sales, and operations. A career of experience leading people, improving systems and processes, and delivering results in both entrepreneurial and technology environments. Known for solving complex problems, taking ownership, and helping teams execute effectively.

Building & Problem Solving

Delivered projects from concept to completion, improving systems, workflows, and outcomes through practical problem solving and execution.

Business Leadership & Operations

10+ years operating businesses, managing people, budgets, vendors, and day-to-day operations while improving processes and driving results.

Technology Sales & Product Enablement

Partnered with customers, product teams, and engineers to drive technology adoption, gather requirements, and translate technical concepts into business value.

PROFESSIONAL EXPERIENCE

Software Engineering & Technology - Teaching Strategies | ReadyRosie

- Built and supported SaaS applications serving educators and families, improving reliability, integrations, testing, and production operations.
- Reduced downtime and enhanced maintainability on high-traffic systems by applying design patterns and testing.
- Improved system performance and customer outcomes by investigating complex technical issues, integrations, and data quality challenges.
- Collaborated with Product, QA, and Engineering teams to deliver customer-facing solutions.
- Owned critical platform integrations and partnered directly with educators and stakeholders to translate customer needs into product improvements, improving data integrity, operational efficiency, and user outcomes.

Business Owner & Operator - Real Estate Operations & Property Management

- Built and operated residential and commercial real estate businesses for over a decade, expanding the company's regional market presence.
- Managed employees, contractors, vendors, budgets, leasing, maintenance, and business operations, ensuring smooth operations and high client satisfaction
- Implemented systems and processes that continuously improved efficiency, consistency, and customer experience.
- Researched, implemented, and adopted technology platforms that automated administrative and operational workflows, improving visibility into business performance, reducing manual effort, and enhancing the customer experience.
- Improved and ensured continuity and customer satisfaction by providing proper training and support to staff on implementation of systems and automation.

Technology Sales & Product Enablement - Immersion Corporation (NASDAQ: IMMR)

- Built and expanded global distribution channels, supporting market adoption across North America, Europe, and Asia through customer training, partner enablement, and technical product demonstrations.
- Delivered technology demonstrations, workshops, and customer presentations while partnering with engineering and product teams to support adoption, solve customer challenges, and translate technology into business value.
- Supported domestic and international customers through product evaluations, implementations, and technology adoption initiatives.
- Worked across sales, product, and engineering teams to align customer needs with technical solutions which shortened the sales cycles and improved solution fit.
